Education

Pranveer Singh Institute of Technology, Kanpur

2024 – 2028

B.Tech in Computer Science and Engineering (Artificial Intelligence)

CGPA: 8.47 / 10

- **Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks, Operating Systems, System Design

Experience

FlyRank AI

July 2026 – Present

Machine Learning Intern

Remote

- Built ML pipelines using **Python, Pandas, NumPy, and Scikit-learn** for preprocessing, feature engineering, training, and evaluation, improving pipeline efficiency by **20%**.
- Trained and evaluated machine learning models on **10K+ records**, performing exploratory data analysis and optimization to improve model performance and reliability.
- Integrated **Hugging Face APIs and AI/LLM models** into application workflows, reducing manual processing effort by **15%**.

Projects

NexHire AI – AI-Powered Interview Platform | *React.js, Node.js, Express.js, MongoDB, OpenAI, Whisper*

[GitHub](#)

- Developed a full-stack AI-powered interview platform with **10+ REST APIs**, resume processing, role-based workflows, and persistent conversation history.
- Built backend services using **Node.js, Express.js, and MongoDB**, implementing authentication, data management, and end-to-end interview workflows.
- Integrated **Whisper, OpenAI, and ElevenLabs APIs** for voice interaction, AI-based evaluation, and personalized candidate feedback.

RakshakAI – Multimodal Disaster Intelligence System | *React, Flask, Python, Scikit-learn, LSTM, CNN, NLP*

[GitHub](#)

- Developed a multimodal disaster intelligence system combining **environmental data, satellite imagery, NLP, and ML** for disaster risk assessment and response.
- Implemented **Random Forest** for current risk prediction, **LSTM** for future risk forecasting, and **CNN-based image analysis** for disaster detection.
- Designed a multimodal risk-fusion pipeline combining current risk, future risk, image analysis, and emergency-report signals into a unified risk score.

NyaySetu – AI-Powered Legal Assistance Platform | *React.js, Node.js, Express.js, MongoDB, JWT*

[GitHub](#)

- Developed a full-stack LegalTech platform with **12+ REST APIs**, document analysis, AI assistance, and automated PDF generation.
- Implemented **JWT authentication, bcrypt security, and RBAC** for 2 user roles, enabling secure and role-specific workflows.
- Built a MongoDB-based communication system supporting **real-time chat, consultation requests, and persistent conversation history**.

Technical Skills

Languages: Java, C, Python, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Python: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, OpenCV, NLTK

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, EDA, Model Training, Model Evaluation

Deep Learning: Neural Networks, CNN, RNN, LSTM, Computer Vision

Generative AI: LLMs, RAG, Hugging Face, OpenAI API, Prompt Engineering, NLP

Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook, Google Colab, Vercel

Certifications

Machine Learning Specialization – DeepLearning.AI & Stanford University	Certificate
AI Essentials – Google	Certificate
Bharatiya Antariksh Hackathon – ISRO	Certificate
HackHatch: The Startup Hackathon – IIIT Delhi	Certificate

Achievements

- **Solved 500+ Data Structures and Algorithms problems**, strengthening problem-solving and algorithmic thinking across core DSA concepts.
- Participated in the **Bharatiya Antariksh Hackathon 2026** organized by **ISRO**, where I developed and submitted a **prototype solution** addressing the hackathon problem statement.
- Participated in **HackHatch: The Startup Hackathon** at **IIIT Delhi**, collaborating on the design and development of an innovative technology-driven solution.
